

Welcome, and thank you for helping out with testing Habit Quest. I would like to emphasise, we are testing the app, not testing you.

A little background information: the goal of Habit Quest is to help users, especially those with ADHD, to change their habits based on their intent.

Part of this test is to see what should be included in our future tutorial messages, as well as what are points of friction that we can work on fixing. So, please, think out loud as much as possible. Additionally, if you run into any problems, please let me know - I can provide guidance on how to continue.

For your first task, please click on the hamburger button - the 3 horizontal lines - in the top left corner, and observe the list of screens. When you are done, please close this pop-up.

Thank you.

For your next task, please show me how you would enable dark mode.

Thank you. You may continue in either dark or light mode, as you prefer.

For your next task, please show me how you would record a new Habit you want to start.

Thank you

For your next task, please show me how you would create a new Habit you want to break.

Thank you.

For your next task, please show me how you would record that you have performed one of your Habits.

Thank you.

For your next task, please show me how you would edit one of your tasks to have a different importance value.

Thank you.

For your next task, please show me how you would delete one of your habits.

Thank you.

Please look at the graph; is the graph clear and understandable? If not, what is unclear? How could we make it more clear?

Thank you.

Please look at the graph; is the graph clear and understandable? If not, what is unclear? How could we make it more clear?

Thank you.

Finally, do you have any additional feedback you would like to provide or highlight?

Now that the initial User Testing is complete, I would like to ask you to try using the app for a week. After the week, I would like to ask you to report back with any additional issues that you noticed, any points of frustration or friction, and how inclined to continue using the app you are.
